

TOPS & BASES

ALUMINIUM TABLE BASE

Aluminium pole and cast aluminium base with a 4kg counter weight
 Suitable for top sizes of: 600mm, 700mm or 800mm round or square
 Available in heavy duty
 SUITABLE FOR OUTDOOR USE

ALUMINIUM BAR BASE

Aluminium pole & cast aluminium base with 3kg counter weight
 Medium duty base: suitable for top sizes of 700mm or 800mm round or square
 SUITABLE FOR OUTDOOR USE

TRIPOD BASES

Available in Pantone Colours

Bar Table:

Footprint: 470mm

Height 1050mm

Aluminium Sand Cast Base

SUITABLE FOR OUTDOOR USE

Standard table base:

Footprint: 540mm

Height 750mm

Aluminium sand cast base

SUITABLE FOR OUTDOOR USE

ALUMINIUM H-BASE

Aluminium pole and cast aluminium base with a 3kg counter weight
 SUITABLE FOR OUTDOOR USE

Coffee table base:

Footprint: 480mm

Height: 400mm

Aluminium sand cast base

SUITABLE FOR OUTDOOR USE

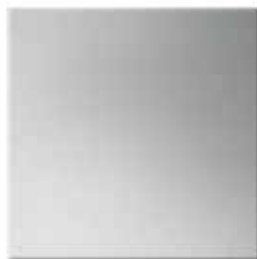

WERZALIT TABLE TOPS

White

Black

Smart Metallic

Maple

Grey Oak

Werzalit tabletops are manufactured with a recycled wood chip core that is strongly bonded together with a high resin content before a smooth closed film is homogeneously pressed onto it. The tops are made in a mould which ensures that the core is sealed and can therefore be used both indoors and outdoors as they are weatherproof and UV resistant. The finished surface is easy to clean and satisfies the hygiene requirements of the catering industry. They are practically impervious to mechanical, thermal and chemical influences and are heat resistant to 180 degree centigrade.

The durability of werzalit table tops satisfies the requirements of DIN EN 438 for kitchen work surfaces. However, they are not infinitely scratch-proof. Hard, rough, sharp edged or mineral based objects, such as metal, stoneware or unglazed porcelain can cause irreparable scratches and scrapes on the table tops. However, this does not impair their usability or long service life.

Tops are available in:

600mm Round

800mm Square

1200mm Rectangular - White Only
